Risk Profile

Portfolio Objective and Strategy

The Fund aims to achieve returns in excess of MSCI All Country World Index p.a. over rolling six-year periods. Fund returns will be generated through dividend income and capital growth. The Fund is a multi-manager Fund ideally comprising at least two underlying funds. Fund selection will be bias towards funds with outperformance of benchmark and to managers whose objective is to achieve long term growth. Where possible underlying funds will be given as many of the equity sector allocation decisions as possible. Underlying investments may be denominated in multiple first world currencies; however, all performance and risk statistics will be measured in the applicable currency.

The Fund will, apart from liquid assets, consists of listed equities, bonds, property equity and money-market instruments as well as participatory interests in collective investment schemes, including exchange traded funds ("Collective Investment Schemes").

The Fund is aimed at investors with a long-term (6 years or more) investment time horizon. This Fund is best suited for investors who can accept some volatile capital movements but seek returns in excess of MSCI All Country World Index over rolling 6-year periods.

Monthly Commentary

The Iza Global Equity Fund delivered a relatively flat return of -0,02% (GBP) and -1,47% (USD) during June, following two exceptionally strong months in April and May. Despite the modest decline, the Fund maintained a robust year-to-date return of 10,14% (GBP) and 8,40% (USD), reflecting the strength of the recovery in global equity markets over the second quarter. The Fund slightly underperformed its benchmark, the MSCI ACWI Index, which returned 0,74% (GBP) and -0,80% (USD) during June. However, the Fund continues to deliver strong absolute returns and remains well-positioned over longer measurement periods, generating 21,31% (GBP) and 17,16% (USD) over one year and 22,85% (GBP) and 28,84% (USD) over two years.

June was characterized by a more mixed market environment. Equity markets paused after the strong gains recorded in April and May, with performance varying significantly across regions and investment styles. While several underlying managers continued to generate positive returns, weakness in higher-growth strategies weighed on overall Fund performance. The strongest-performing underlying holdings during the month included the Guinness Global Innovators Fund, delivering a return of 2,78%, the T-Rowe Price Global Focused Growth Equity Fund, delivering a return of 1,57%, and the Dodge and Cox Worldwide Global Stock Fund, delivering a return of 1,33%. The main detractor of the fund was Scottish Mortgage, which delivered a negative return of -3,38%, reflecting profit-taking in growth-oriented equities following significant gains in previous months.

In June our top contributions to performance were from the Dodge and Cox Worldwide Global Stock Fund, which contributed 0,17%. The Guinness Global Innovators Fund, which contributed 0,14%. The T-Rowe Price Global Focused Growth Equity Fund once again forming part of our top contributors to performance contributing 0,13%.

Collective Investment Schemes (CISs) are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up, and therefore, the CIS Manager does not make guarantees with respect to the protection of capital or returns of the investment. Past performance is not necessarily a guide to future performance. CISs are traded at ruling process and can engage in borrowing and scrip lending. The portfolio may include underlying foreign investments, and may as a result be exposed to macroeconomic, political, foreign exchange, tax, settlement, reporting or illiquidity risk factors that may be different to similar investments in South African markets. The underlying foreign investments may also be adversely affected by foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities of the relevant countries. The CIS Manager reserves the right to close the fund to new investors if it is necessary to limit further inflows for it to be managed in accordance with its mandate. Investors in the Fund are not protected by any statutory compensation arrangements in Mauritius in the event of the fund's failure. The Mauritius Financial Services Commission does not vouch for the financial soundness of the fund or for the correctness of any statements made or opinions expressed regarding it. In certain circumstances, a participant's right to redeem his shares may be suspended. Applicants are assumed to have read and understood the Prospectus and accept the risk of an investment in PIM Capital Limited PCC. It is understood that they are aware that the portfolio of securities is subject to market fluctuations and to the risks inherent in all investments, and that the price of shares and any income from the shares may go down as well as up, and that the fund may be subject to volatile price movements which may result in capital loss.

Past performance does not predict future returns. No guarantee is provided, either with respect to the capital or the return of the fund. The value of participatory interests or the investments may fluctuate in value and may fall as well as rise. A schedule of fees, charges, maximum commissions, and a detailed description of performance fee calculation and application is available on request. Daily unit pricing and performance is available on Bloomberg. NAV to NAV figures have been used. Investment performance is for illustrative purposes only.

Excessive withdrawals from the fund may place the fund under liquidity pressure and in such circumstances, a process of ringfencing withdrawal instructions and managed payouts may be followed. Commission and incentives may be paid and if so, these will be included in the overall costs. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Fund valuations take place at approximately 24h00 (MUT) each business day and forward pricing is used. Instructions must reach the manager before 16h00 (MUT) one day prior to the dealing date. You can expect to receive withdrawal payouts five business days after valuation distribution. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund. A schedule of fees and charges and maximum commissions is available on request from the CIS Manager.

Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance may differ as a result of initial fees, the actual investment date, and the date of reinvestment. The investment performance is for illustrative purposes only. The investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. The value of participatory interests or the investment may go down as well as up. The CIS Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. All CISs are traded at ruling prices and can engage in borrowing and scrip lending. Income is reinvested on the investment date. The CIS Manager has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.

Mandatory cost disclosure as per the regulator: USD 6,750 p.a. Audit fee: USD 600 p.a. annual FSC fees. A schedule of fees and charges, maximum commissions and a schedule of similarities and differences is available on request from the CIS Manager.

Total Expense Ratio (TER) is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are included. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs (TC) is necessary in managing the fund and impacts the fund's return. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and Transaction Costs (TC).

This is a Minimum Disclosure Document (MDD) and any attachments to it constitute factual and objective information about the fund, and nothing contained herein should be construed as constituting any form of investment advice or recommendation, guidance or proposal of a financial nature in respect of any investment issued by PIM Capital Limited PCC.
